REMARKS

STATUS OF CLAIMS

Claims 1-4 were in the original Patent and are presented herein.

Claim 2 has been amended herein while Claims 1, 3 and 4 remain the same.

SUPPORT FOR ALL CLAIM CHANGES

Claim 2 has been amended to recite that the Z phase pulse signal is not generated on rotation of a real electric motor in the master section and to eliminate the wording from the claim because the electric motor Mm and the encoder Pm are not provided in the master section in Claim 2. The point of claim 2 is to use a means for electrically generating pulses equivalent to output of the encoder Pm in the master section. Namely, in this case, the electric motor Mm and the encoder Pm are not provided in the master section as shown in Fig. 1. Support for this amendment is in the Specification at Column 7, lines 28-43.

Should any fees be necessary in order to maintain this Application in pending condition, appropriate requests are hereby made and authorization is given to debit Account #02-2275.

Respectfully submitted,

MUSERLIAN, LUCAS AND MERCANTI, LLP
